

# Clusterheadache attacks Personal report

Thanks for the data you've shared. Every month we try to get a better report based on your own data. This report tries to give insight about your cluster headache attacks over time. We thought that **Frequency, intensity and duration** of attacks were the most important factors to start with. So that's what we concentrated on for now.

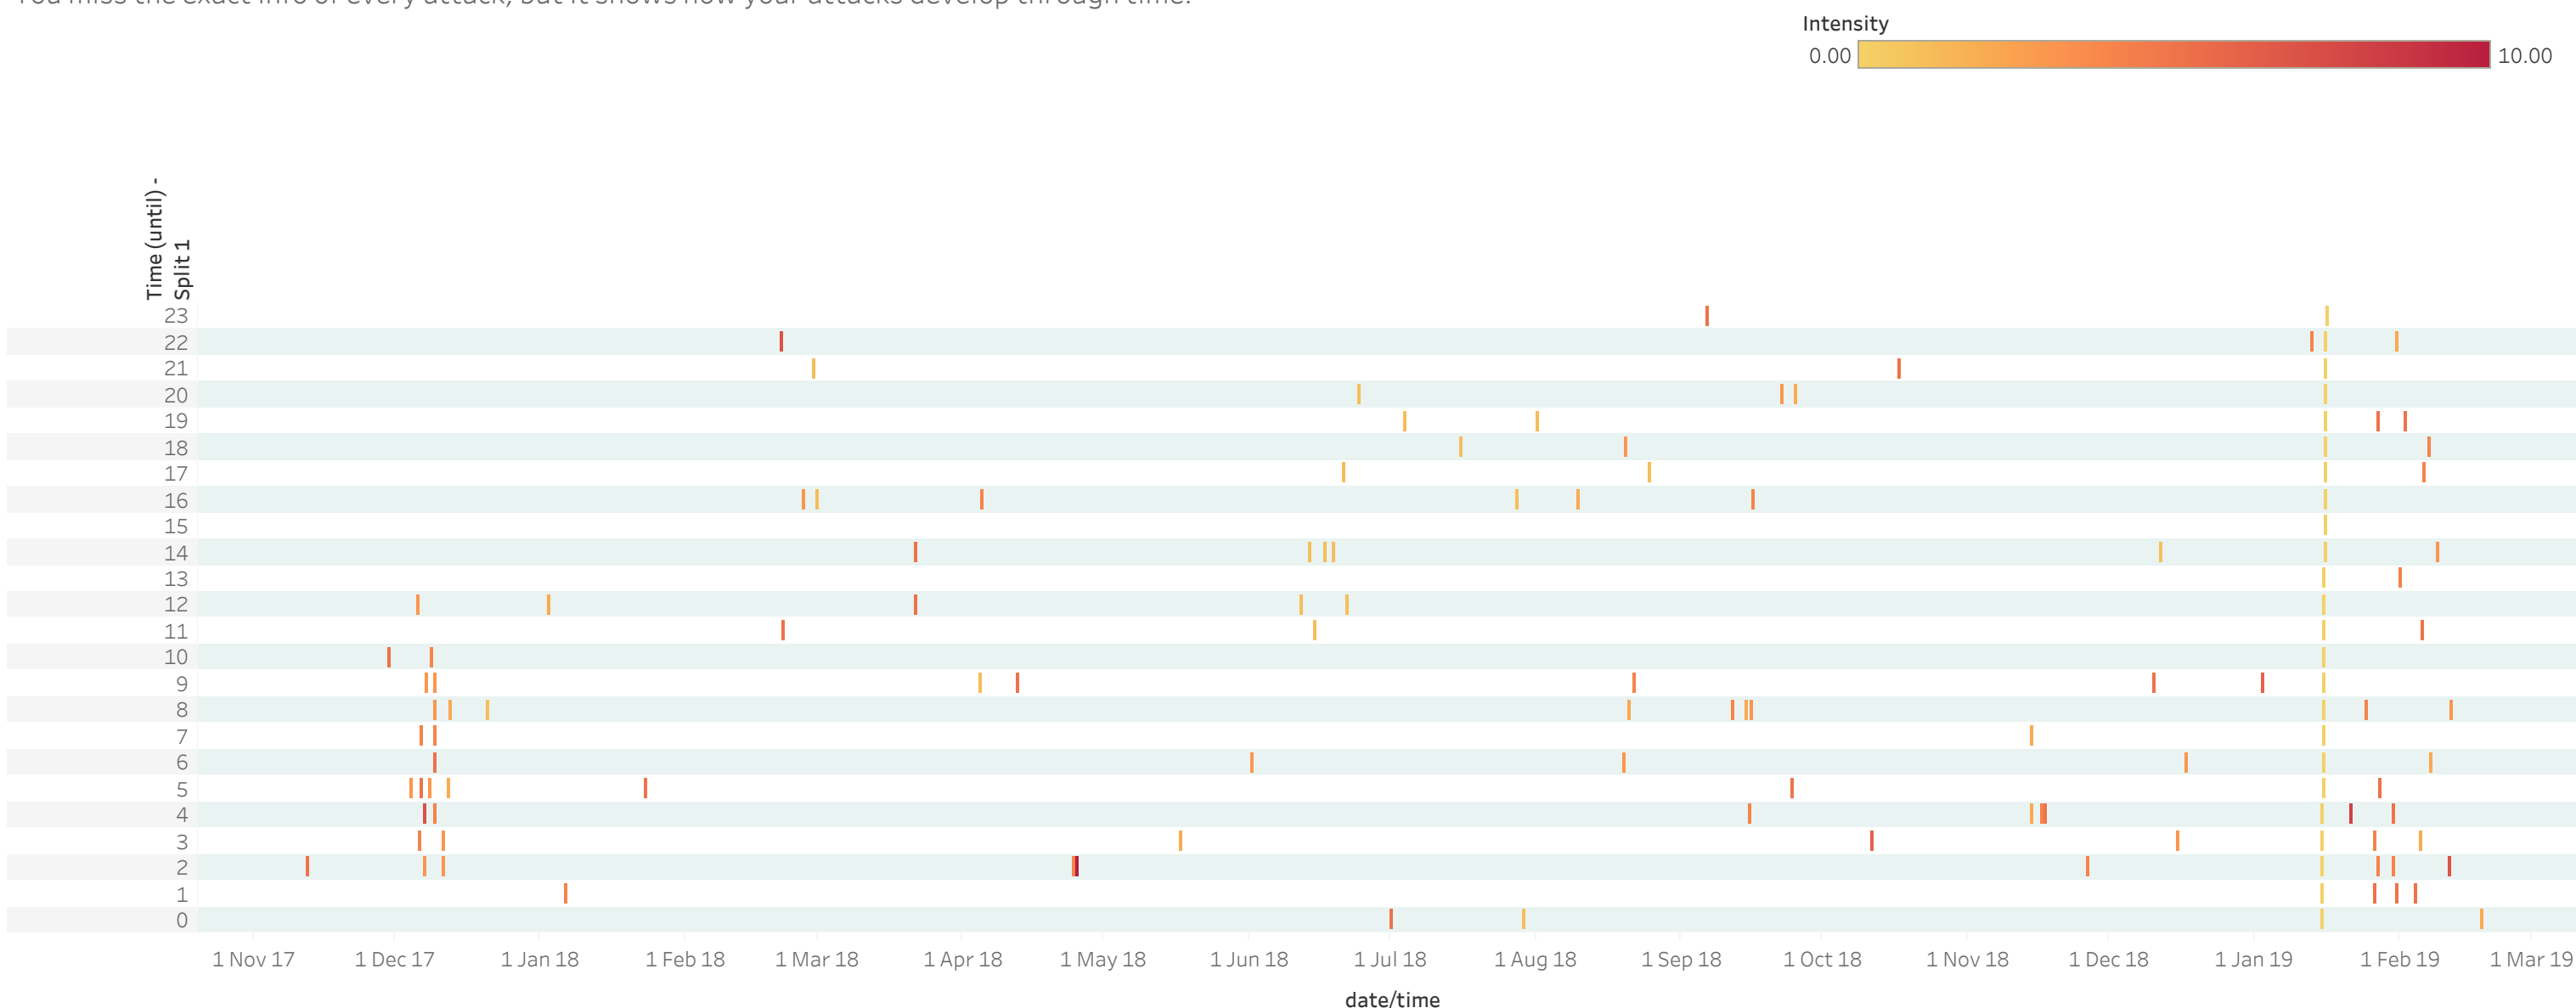

All you see is based on the data you collected. ...

Amount of attacks per month

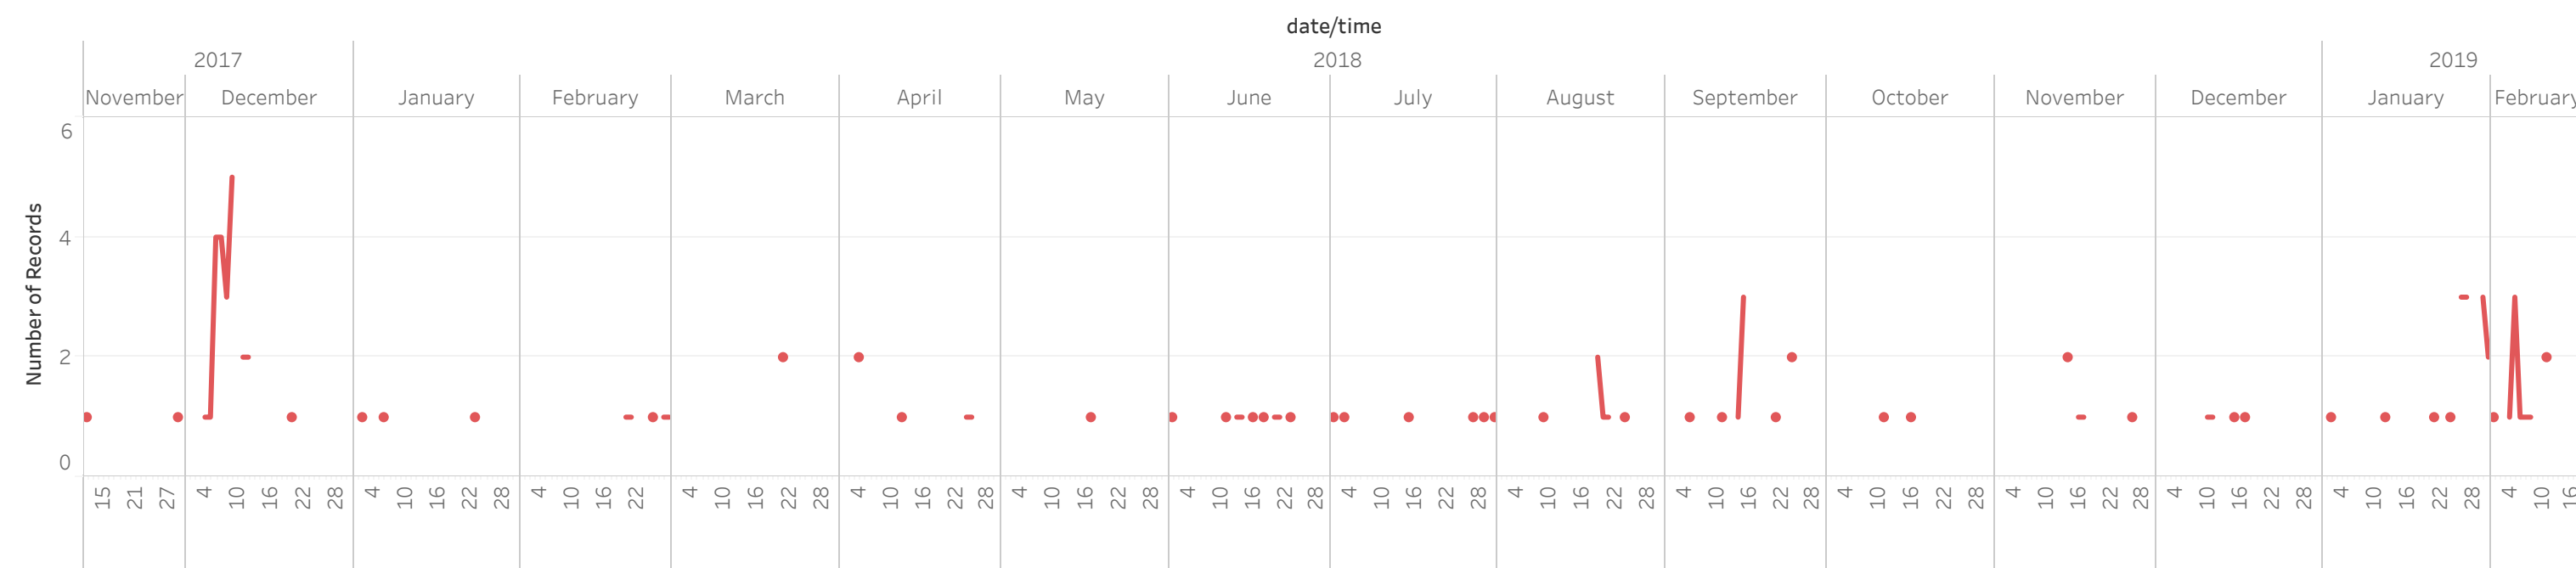

## Timelines Clusterheadache Attacks

The Timeline gives insight in the pattern of your attacks. It shows your attacks and intensity through time. You miss the exact info of every attack, but it shows how your attacks develop through time.

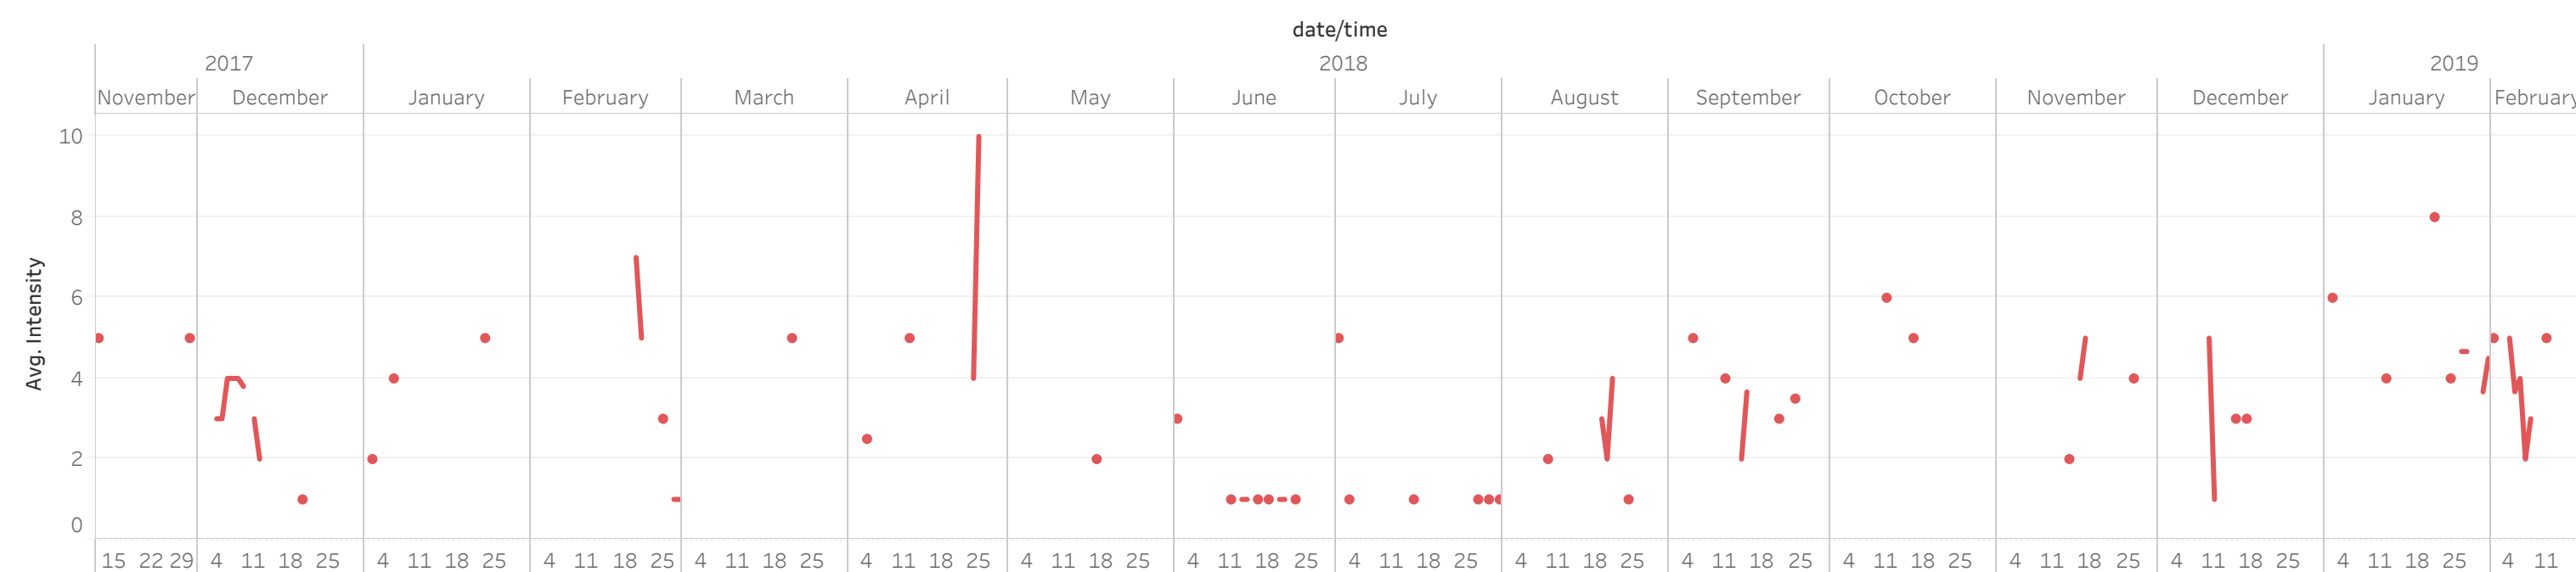

## Attacks per day

This chart shows your attack frequency per day. If you only have some attacks here and there, only dots appear. Once you have continuous days a continuous line appears, so you know that those days were connected.

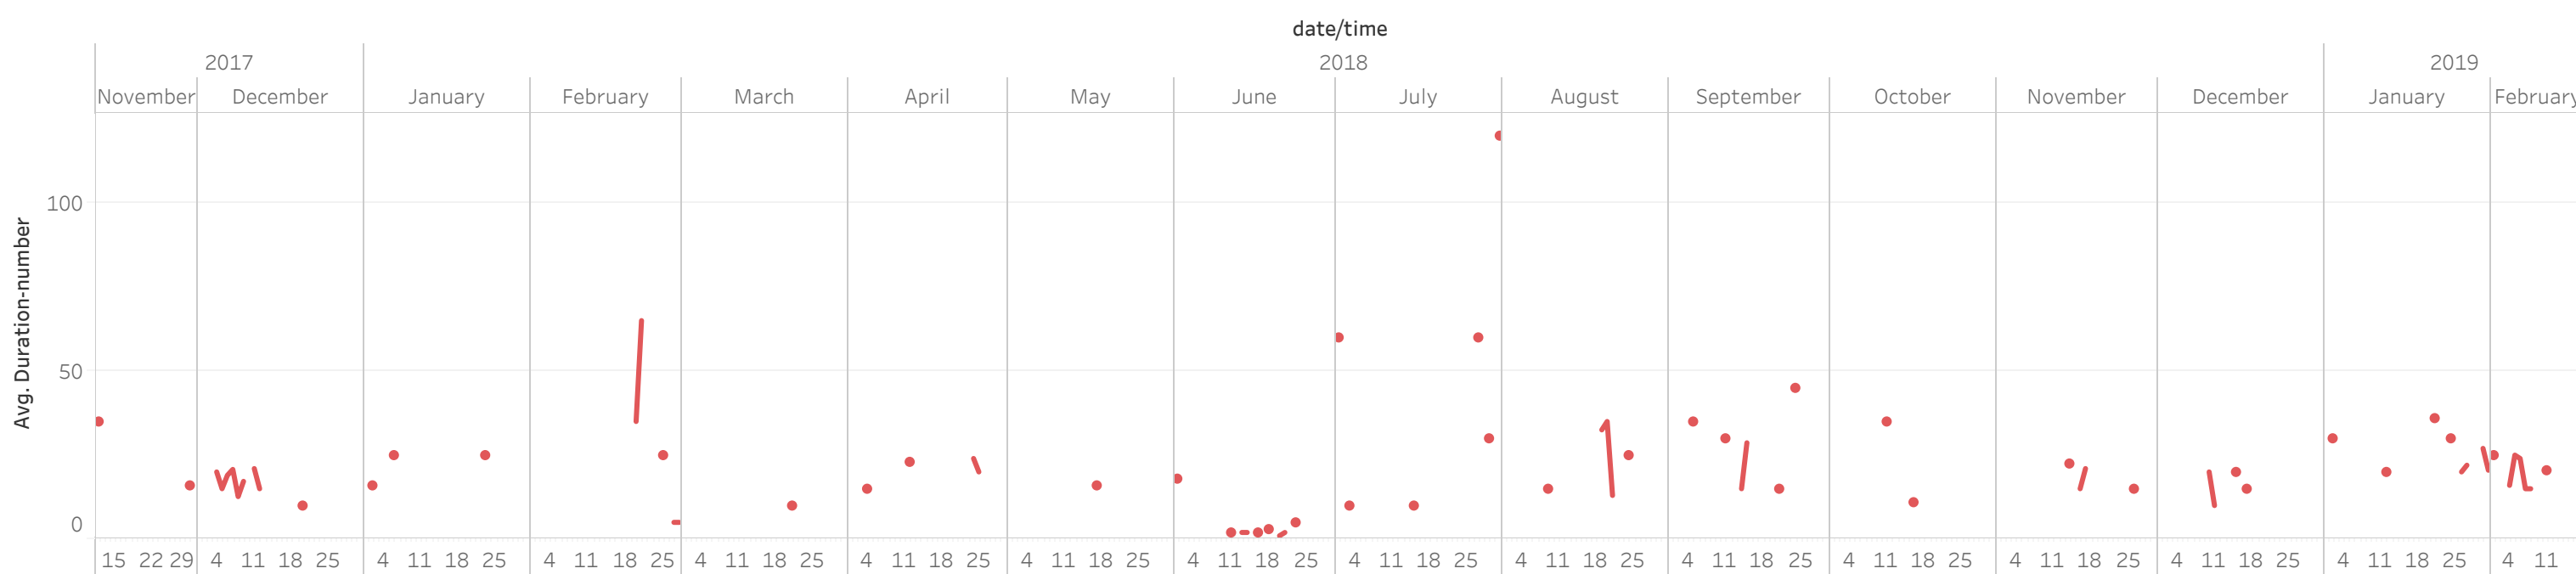

## Average Intensity per day

This second chart shows your average intensity per day. The average is calculated like this: if you had 4 attacks, with intensity 5,7,7,6, the average of that day will be  $(5+7+7+6):4 = 6.25$

## Average Duration per day

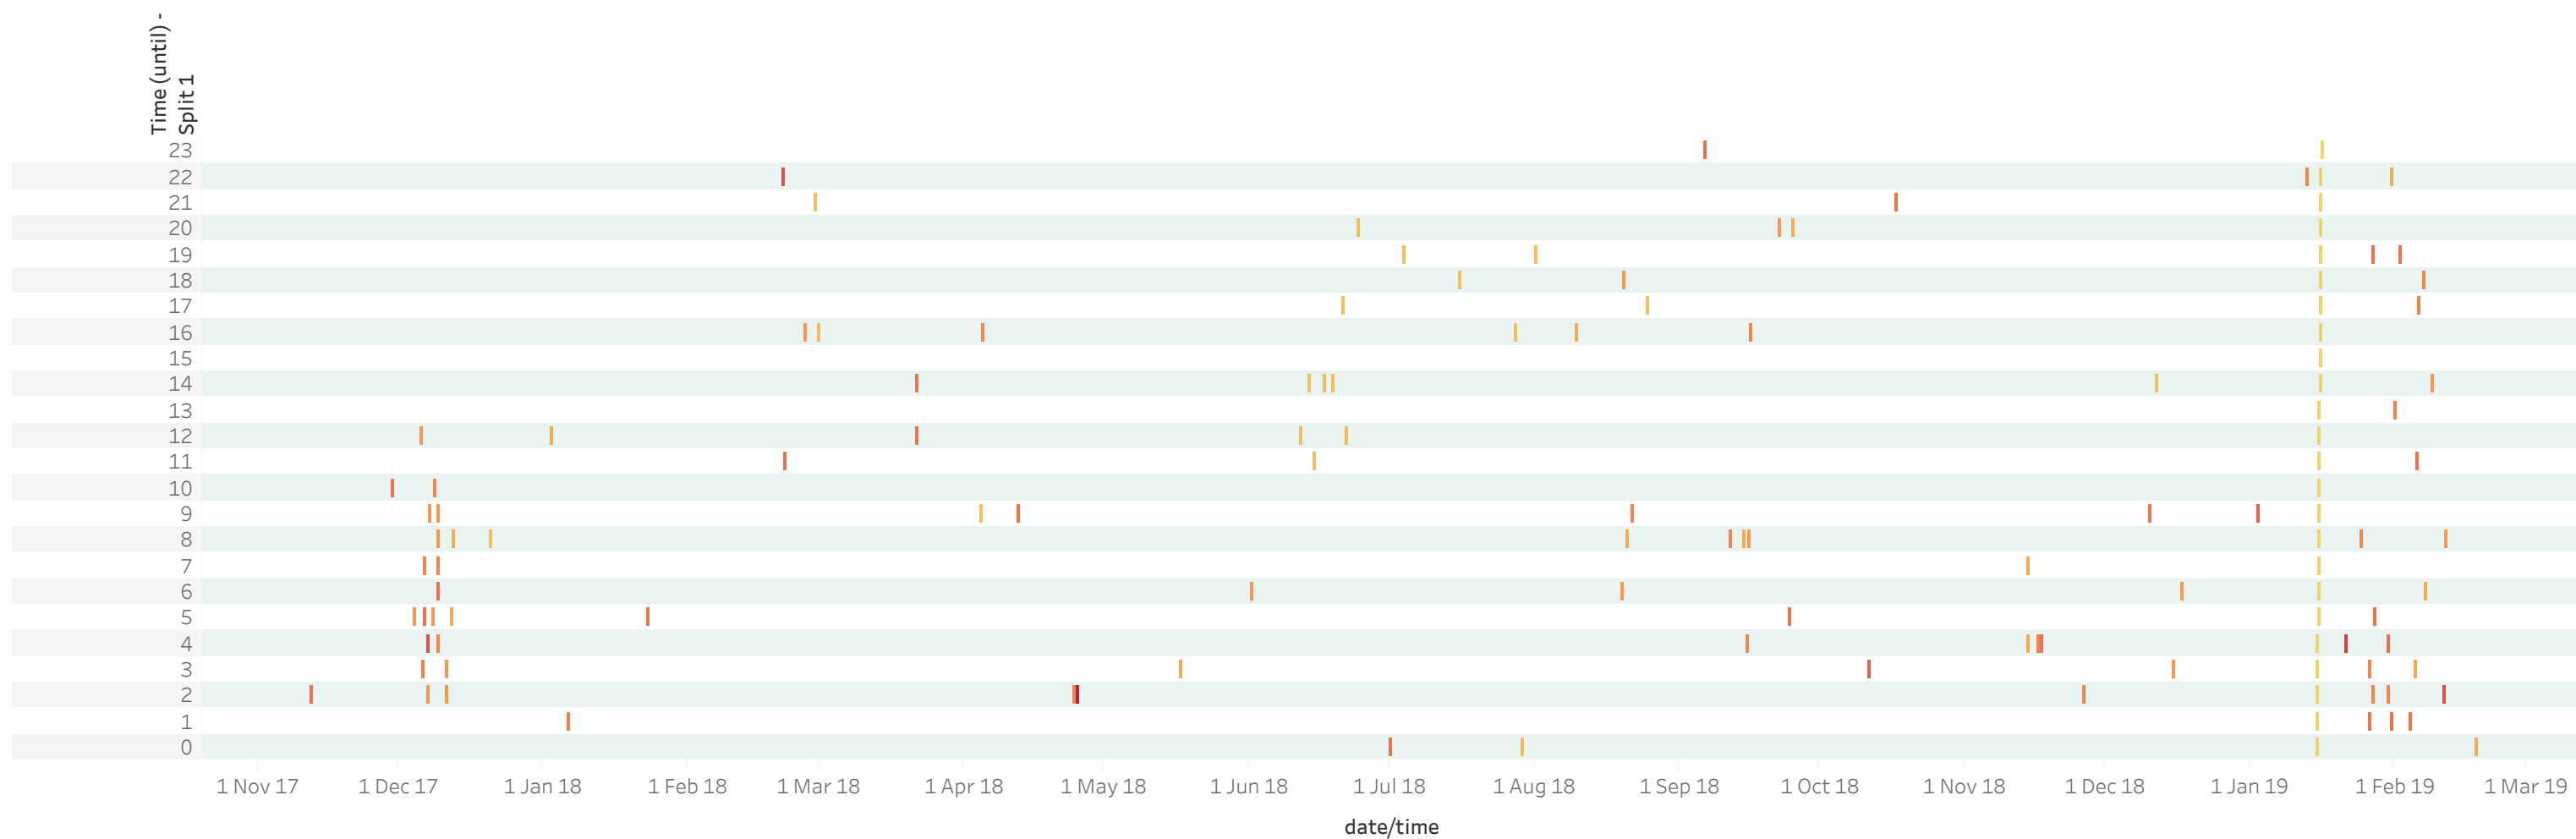

This third Chart is about the average attack duration per day. It works in the same way as the average intensity, we count all the minutes and divide them by the quantity of attacks.

# Treatments and other symptoms Personal report

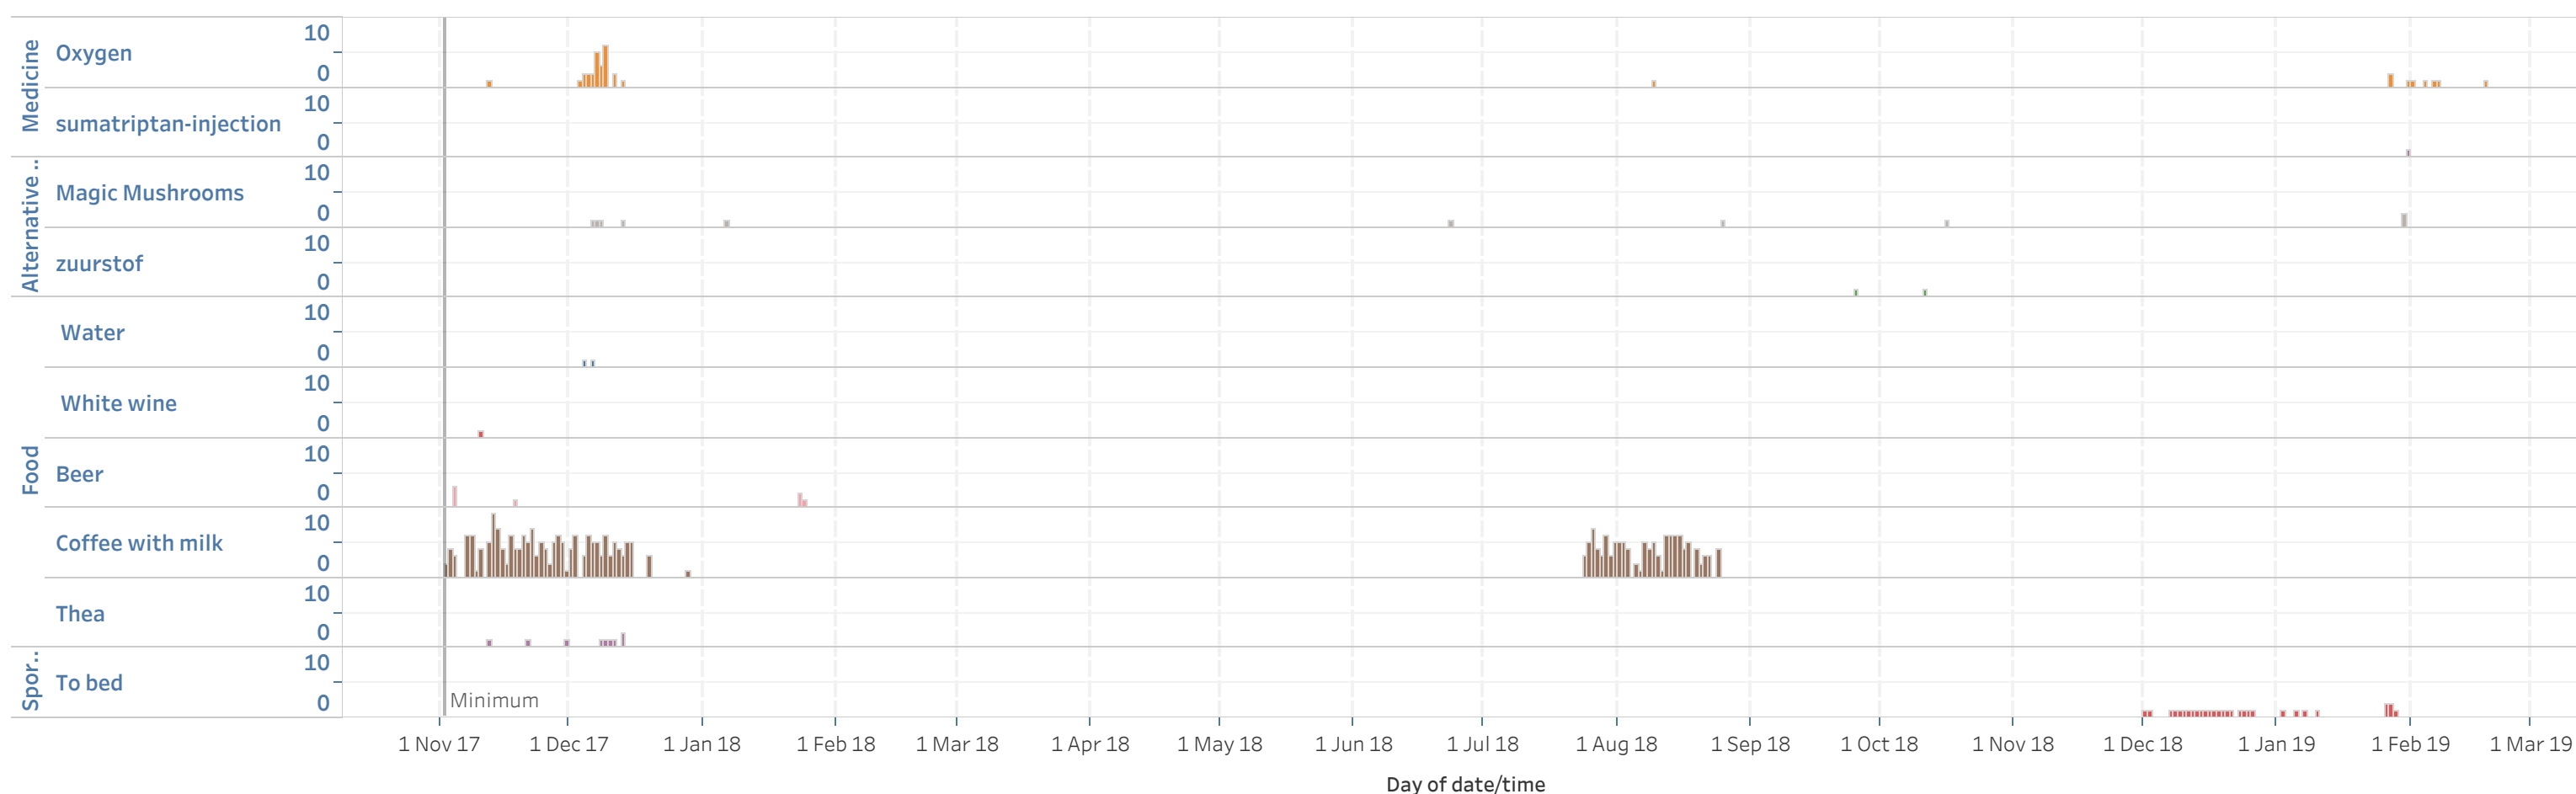

## Timelines Clusterheadache Attacks

The Timeline gives insight in the pattern of your attacks. It shows your attacks and intensity through time. You miss the exact info of every attack, but it shows how your attacks develop through time.

## Use of treatments

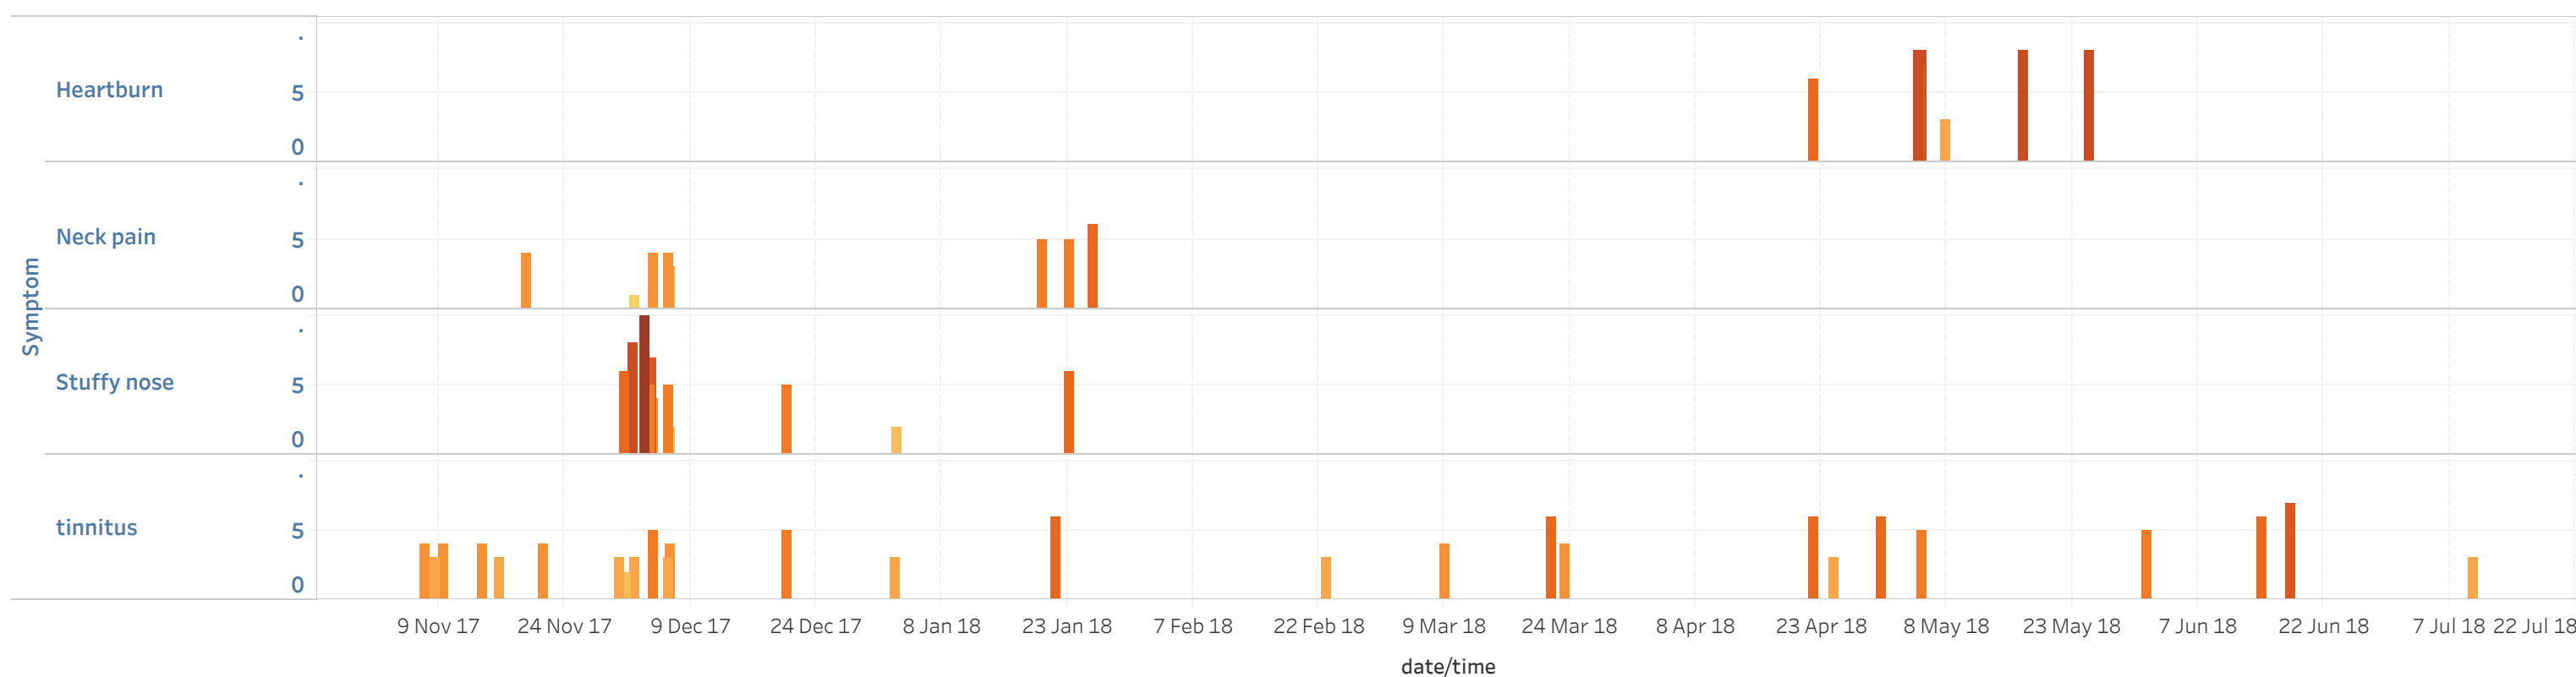

Every treatments taken is listed in this chart. We only show here the count/day.

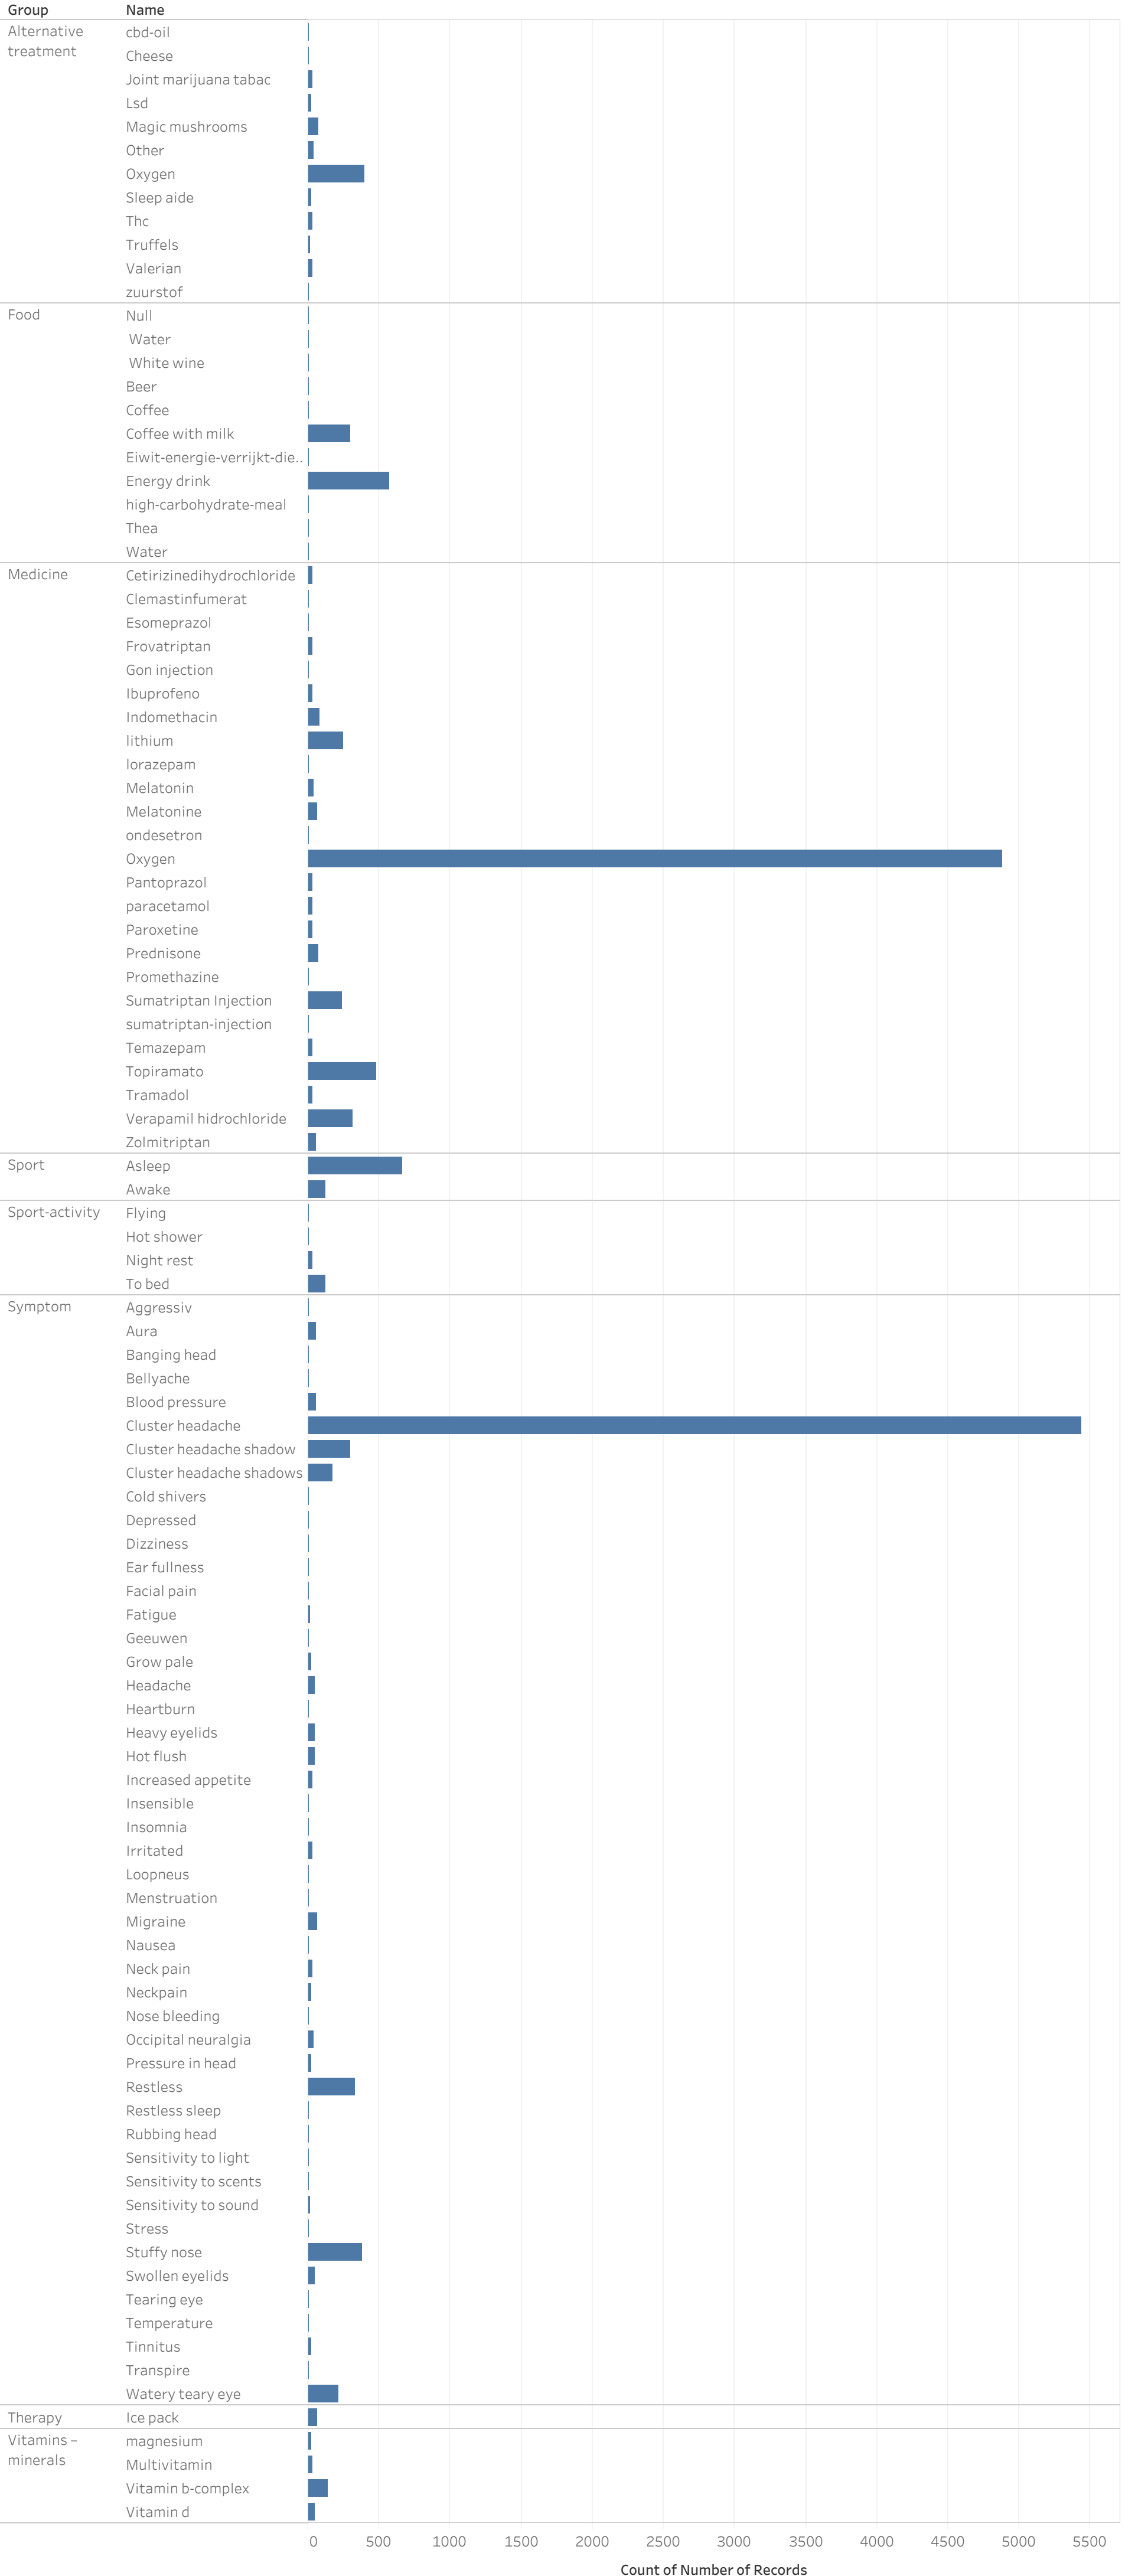

## Other Symptoms NEW

This overview shows the intensity of the other sypptoms you kept track off.

Every individual point is a registration. Color and position show the intensity per individual registration. Those that had no intensity are displayed at the baseline of every line.
